## Profile

A team player and leader who inspires colleagues to perform their best. Detail-oriented and passionate about building robust, scalable applications using technologies like **JavaScript, TypeScript, React Native, Node.js, React, NestJS, MongoDB** and **SQL**. Adept at managing both frontend and backend development, with a knack for optimizing user experiences and system performance. Skilled in mentoring and training development teams, working on advance technology, and driving projects to successful completion. Friendly and engaging, regularly exceeding project goals while fostering collaboration. A master in problem-solving, always striving to improve software performance and scalability.

## Experience

### **SR. FULL STACK DEVELOPER | META LOGIX TECH | OCTOBER 2020 – PRESENT**

- Developed a robust backend for the 'LA Moving Star' web application using Node.js, Express, SQL, and multiple databases, contributing to a 25% increase in business growth through enhanced functionality and scalability.

Website: <https://client.lamovingstar.com/create-request>

- Developed a robust backend for the 'Vissioon' web application using Node.js, Express, MongoDB, and microservices architecture, improving API response time by 30% through enhanced functionality and scalability.

Website: <https://vissioon.co/>

- Developed a robust backend for the 'Done' web application and mobile application using Node.js, Express, MongoDB, improving API response time by 30% through enhanced functionality, scalability and structural improvements.
- Website: <https://doneworkspace.com/>
- Developed "DONE" a task management app providing performance tracks, using React Native with a focus on UI development, state management, API integration, and cross-platform optimization for iOS and Android.

### **APPLICATION DEVELOPER | META LOGIX TECH | OCTOBER 2020 – OCTOBER 2022**

- Developed a fully functional clone of "The Source" app using React Native, focusing on UI development, state management, API integration, and cross-platform optimization for iOS and Android.

Android: <https://play.google.com/store/apps/details?id=com.dynamite.digital>

iOS: <https://apps.apple.com/us/app/the-source/id1523454894>

- Developed "SoulCalm," a meditation app providing meditation tracks, using React Native with a focus on UI development, state management, API integration, and cross-platform optimization for iOS and Android.

Android: <https://play.google.com/store/apps/details?id=com.coachingoflife.app>

iOS: <https://apps.apple.com/pk/app/soulcalm-relax-meditation/id1643130857>

- Developed "CalmVibe," a meditation and habit tracker app providing meditation tracks, habit tracker, daily quotes and daily notes, using React Native with a focus on UI development, state management, API

integration, and cross-platform optimization for iOS and Android.

Android: <https://play.google.com/store/apps/details?id=com.calmvibe.app>

iOS: <https://apps.apple.com/us/app/calmvibe-meditation-and-habit/id6450288489>

## Education

**BACHELOR OF SCIENCE IN COMPUTER SCIENCE | JULY 2021 | UNIVERSITY OF SAHIWAL, SAHIWAL PUNJAB PAKISTAN**

## Skills & Abilities

- React Native
- Android
- IOS
- Java Script
- jQuery
- Firebase
- Redux
- In App Purchases
- Context
- Google Maps
- Social Media Login
- Node .js
- Nest .js
- React
- Type Script
- Java
- Express
- Microservices
- Mongo DB
- SQL DB
- Stripe
- Socket.io

## Activities and Interests

hiking, travel, reading new tech documentations, searching innovative ideas
